The Training and Placement Cell of DRK INSTITUTE OF SCIENCE AND TECHNOLOGY Conducted training program on “Professional Awareness and Career Guidance Program For Engineering Fresher’s”

The program's goal is to support recently graduated engineers as they set out on their careers. This program seeks to give recent technical graduates the necessary information and support to make educated decisions about their entry-level careers and positions in both public and private businesses.

The program begins with in-depth professional awareness seminars that introduce participants to several graduate development programs and the significance of internships. After that, it provides individualized career counseling to assist people in matching their interests and skill set with certain engineering specialties. Participants gained insight into industry expectations and real-world issues, as well as the benefits of working with experienced engineers on industrial prospects. The program also highlights the value of mentoring for education, training, and departmental rotations, all of which help engineering freshmen be ready for employment options.

Through the recognition of the practical knowledge that is required and the development of professional networking, this program equips recent graduates with the confidence to move forward with their industrial involvement. The Training and Placement Officer gave a vote of appreciation to finish the session.

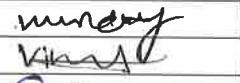

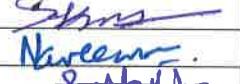

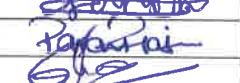

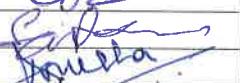

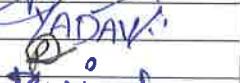

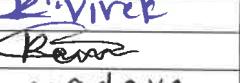

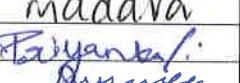

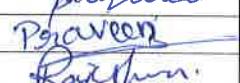

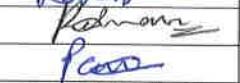

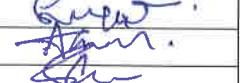

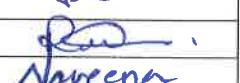

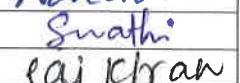

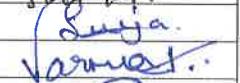

Number of participants: 120
