EVENT REPORT

DATE :05.09.2023

Name of the programme: Teacher's Day

Date of the programme : 05.09.2023

This program is proudly initiated by students of all departments of DRK Institute of Science and Technology on 5th september.

In India, 5th September is celebrated as Teachers Day as a mark of tribute to the contribution made by teachers to the society. 5th September is the birthday of a great teacher **Dr. sarvepalli Radhakrishnan**, a staunch believer of education and a well known diplomat, visionary, statesman, scholar, president of India and above all a perfect Teacher. Teachers mould the lives of students by guiding them, by enriching their personalities, by imparting ethical and moral values and have more influence on them. This day is dedicated to the teachers with the sense of respect, appreciation, encouragement and support for their devotion to their students.

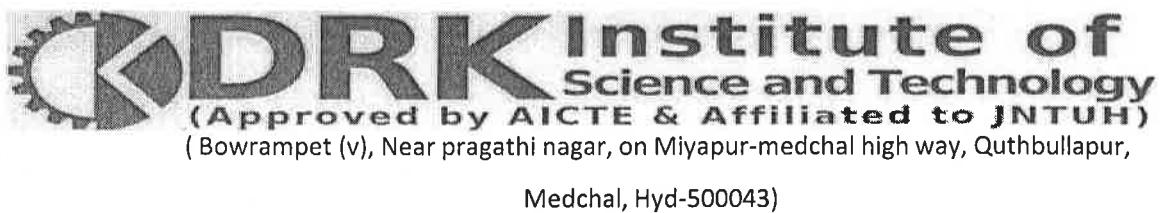

The Teachers day was celebrated by the students of all departments at DRKIST campus on 5th September to express their gratitude for the immense contribution put forth by their teachers towards their development. Students decorated the college campus with the decorative items on the eve of Teachers day and faculties welcomed warmly. Each of the faculties was given a gift as a token of gratitude to show the acknowledgement and recognition of the hardwork put by the teachers towards their development.

Conclusion

The event was concluded by the reviews of Principal sir, Dean sir, AO sir, HOD's and all faculties. Finally the students requested Principal sir to cut the cake and make the day more memorable and successful.

EVENT REPORT

DATE :05.09.2022

Name of the programme: Teacher's Day

Date of the programme : 05.09.2022

This program is proudly initiated by students of all departments of DRK Institute of Science and Technology on 5th september.

In India, 5th September is celebrated as Teachers Day as a mark of tribute to the contribution made by teachers to the society. 5th September is the birthday of a great teacher **Dr. sarvepalli Radhakrishnan**, a staunch believer of education and a well known diplomat, visionary, statesman, scholar, president of India and above all a perfect Teacher. Teachers mould the lives of students by guiding them, by enriching their personalities, by imparting ethical and moral values and have more influence on them. This day is dedicated to the teachers with the sense of respect, appreciation, encouragement and support for their devotion to their students.

The Teachers day was celebrated by the students of all departments at DRKIST campus on 5th September to express their gratitude for the immense contribution put forth by their teachers towards their development. Students decorated the college campus with the decorative items on the eve of Teachers day and faculties welcomed warmly. Each of the faculties was given a gift as a token of gratitude to show the acknowledgement and recognition of the hardwork put by the teachers towards their development.

Conclusion

The event was concluded by the reviews of Principal sir, Dean sir, AO sir, HOD's and all faculties. Finally the students requested Principal sir to cut the cake and make the day more memorable and successful.

EVENT REPORT

DATE :15.09.2020

Name of the programme: Engineer's Day

Date of the programme: 15.09.2020

This program is proudly initiated by staff and students of Mechanical department of DRK Institute of Science and Technology on 26th January.

On the occasion of Birth Anniversary of India's most prominent engineer Dr.Mokshagundam Vishweshvaraya we celebrate Engineers day in the remembrance of their remarkable works in engineering field. MECH Dept. celebrates this occasion every year with full of enthusiasm.

The program was started with lamp lightening by the principal. The theme for our program was “Engineering for change”. Some students shared their opinion of in form of speeches about the theme Engineering for change and about Dr.Mokshagundam Vishweshvaraya. Our principal delivered an excellent speech for the younger generation of Engineers. They pointed out the importance of honesty, confidence, efforts and leadership skills for the emerging civil engineers to raise their carrier. The program was attended by many students from first year to final year and the enthusiasm of students was overwhelming. The vote of thanks for the program was done by Mrs. kanneganti sravani (Asst.prof Mech Dept)

Conclusion

After the program was completed the prizes were distributed to winners in various competitions held in college and also distributed the sweets.

EVENT REPORT

DATE :05.09.2020

Name of the programme: Teacher's Day

Date of the programme: 05.09.2020

This program is proudly initiated by students of all departments of DRK Institute of Science and Technology on 5th september.

In India, 5th September is celebrated as Teachers Day as a mark of tribute to the contribution made by teachers to the society. 5th September is the birthday of a great teacher **Dr. sarvepalli Radhakrishnan**, a staunch believer of education and a well known diplomat, visionary, statesman, scholar, president of India and above all a perfect Teacher. Teachers mould the lives of students by guiding them, by enriching their personalities, by imparting ethical and moral values and have more influence on them. This day is dedicated to the teachers with the sense of respect, appreciation, encouragement and support for their devotion to their students.

The Teachers day was celebrated by the students of all departments at DRKIST campus on 5th September to express their gratitude for the immense contribution put forth by their teachers towards their development. Students decorated the college campus with the decorative items on the eve of Teachers day and faculties welcomed warmly. Each of the faculties was given a gift as a token of gratitude to show the acknowledgement and recognition of the hardwork put by the teachers towards their development.

Conclusion

The event was concluded by the reviews of Principal sir, Dean sir, AO sir, HOD's and all faculties. Finally the students requested Principal sir to cut the cake and make the day more memorable and successful.

EVENT REPORT

DATE :15.09.2019

Name of the program: Engineer's Day

Date of the program : 15.09.2019

This program is proudly initiated by staff and students of Mechanical department of DRK Institute of Science and Technology on 26th January.

On the occasion of Birth Anniversary of India's most prominent engineer Dr.Mokshagundam Vishweshvaraya we celebrate Engineers day in the remembrance of their remarkable works in engineering field. Our Mechanical Dept. celebrates this occasion every year with full of enthusiasm.

The program was started with lamp lightening by the principal. The theme for our program was "**Engineering for change**". Some students shared their opinion of in form of speeches about the theme Engineering for change and about Dr.Mokshagundam Vishweshvaraya. Our principal delivered an excellent speech for the younger generation of Engineers. They pointed out the importance of honesty, confidence, efforts and leadership skills for the emerging civil engineers to raise their carrier. The program was attended by many students from first year to final year and the enthusiasm of students was overwhelming. The vote of thanks for the program was done by Mrs. kanneganti sravani (Asst.Prof Mech Dept)

Conclusion

The program was followed by cutting cake and giving a gift to participating students for their support and enthusiasm for celebration. The program ended with vote of thanks by organizer.

EVENT REPORT

DATE :05.09.2019

Name of the program: Teacher's Day

Date of the program : 05.09.2019

This program is proudly initiated by students of all departments of DRK Institute of Science and Technology on 5th september.

In India, 5th September is celebrated as Teachers Day as a mark of tribute to the contribution made by teachers to the society. 5th September is the birthday of a great teacher Dr. sarvepalli Radhakrishnan, a staunch believer of education and a well known diplomat, visionary, statesman, scholar, president of India and above all a perfect Teacher. Teachers mould the lives of students by guiding them, by enriching their personalities, by imparting ethical and moral values and have more influence on them. This day is dedicated to the teachers with the sense of respect, appreciation, encouragement and support for their devotion to their students.

The Teachers day was celebrated by the students of all departments at DRKIST campus on 5th September to express their gratitude for the immense contribution put forth by their teachers towards their development. Students decorated the college campus with the decorative items on the eve of Teachers day and faculties welcomed warmly. Each of the faculties was given a gift as a token of gratitude to show the acknowledgement and recognition of the hardwork put by the teachers towards their development.

Conclusion

The event was concluded by the reviews of Principal sir, Dean sir, AO sir, HOD's and all faculties. Finally the students requested Principal sir to cut the cake and make the day more memorable and successful.

EVENT REPORT

DATE :26.01.2020

Name of the program: Republic Day

Date of the program : 26.01.2020

This program is proudly initiated by principal, management and staff of the DRK Institute of Science and Technology on 26th January.

The day was celebrated in our campus with great eclat. The campus building was decorated with flowerpots and national flags. Everyone was feeling very patriotic and happy because it was matter of grate pride for all of us. After all, on this day the constitution of India came into force and our country became a republic.

On this day, Sri D. Sriram sir, Treasurer of DRK group of institutions, was hoisted the flag in the DRK college campus. The main attraction of Republic Day celebrations is singing a patriotic song, speech on freedom fighters, and dances on republic day theme by students at the DRK campus bowrampet.

Conclusion

After the program was completed the prizes were distributed to winners in various competitions held in college and also distributed the sweets.

Program report

Program Name : Sankranthi festival Celebrations
Date of activity : 15-01-2023
Venue : College campus
Organized by : IQAC, DRKIST
Number of participants: 20

Report:

Makar Sankranthi is a Hindu Festival celebrated in the different names all over the country. It has a great astronomical significance as it marks the beginning of Sun's movement Northward for a period of six months (uttarayan). The word sankranthi refers to the event of sun entering the zodiac sign of Capricorn (Makara Rashi). The DRKIST has celebrated the "Uttarayan-2023" and was celebrated in the form of "Kite festival". The Kite Festival is one. Of the most celebrated festivals of Hyderabad and the event was organized by the student club the students from all the departments participated and as well faculty members also graced the occasions.

Empowering women with Self Disabilities

Women and girls with disabilities experience gender inequality, social exclusion, discrimination, and violence in different ways. Development strategies, formulated with their full participation and consultation, are needed.

Around 19% of women globally, and 22% of women in lower-income countries, have a disability compared to 12% of men. Yet women and girls with disabilities have largely remained invisible in development projects and policies. They face similar forms of discrimination and social disadvantage as their male counterparts and women and girls without disabilities.

However, when the impacts of gender inequality and disability exclusion are combined, women and girls with disabilities face compounded forms of exclusion, driven by discrimination, and experience stigma due to social norms.

They are more likely to experience poverty and suffer from hunger, malnutrition, and violence.

Moreover, there is a pervasive and harmful perception that women and girls with disabilities are “unfit for parenthood,” which exposes them to a higher likelihood of forced or involuntary sterilization.

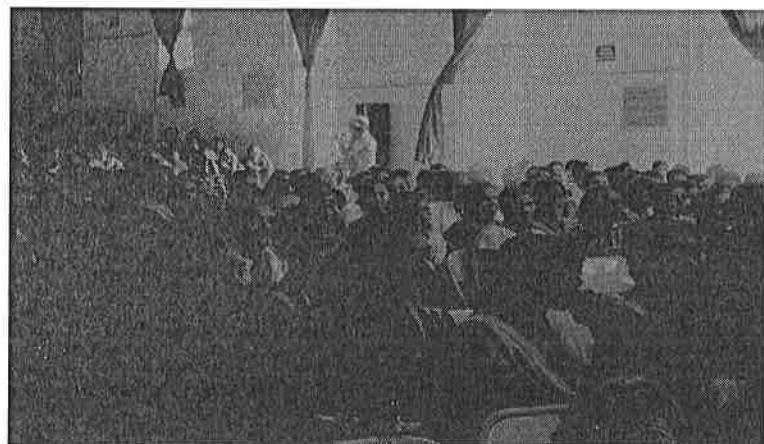

The varied forms of disability – physical, sensory, cognitive and psychosocial – create different barriers for women and girls. Although they all face higher rates of violence, there is evidence that women and girls with cognitive impairments experience the highest rates of intimate partner violence, followed by those with psychosocial impairments, sensory impairments, and then those with physical disabilities. Girls with cognitive disorders may also be targeted for trafficking in sexual exploitation and begging.

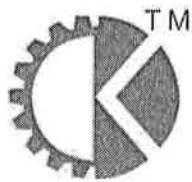

Psychosocial and physical disabilities can also result from the impacts of gender discrimination, as well as the intersection of gender and other forms of discrimination. This includes discrimination experienced by women and girls of various races and ethnicities, as well as those belonging to indigenous groups, lower castes, indigenous tribes, and individuals with diverse sexual orientations, gender identities, expressions, and sex characteristics, among others.

As women with disabilities are not a homogenous group, strategies need to consider the diversity that exists within their identities, culture and forms of disability.

Understanding there is no “one size fits all” approach is the first step to ensure no-one is left behind in the sustainable development of Asia and the Pacific.

In particular, action needs to be taken to address the needs, concerns, and empowerment of women and girls with disabilities in the infrastructure sector (water, sanitation, and hygiene, urban development, and transport), and social sector (education, health, and social protection).

WOMEN IN THE DIGITAL AGE

This study aims to identify key factors and trends in the participation of women in ICT and its dynamics and analysis the practices enabling women's participation in the digital world.

57% of tertiary graduates in the EU are women, but only 24.9% of them graduate in ICT-related fields, and very few enter the sector. Women make up 13% of the graduates in ICT-related fields working in digital jobs compared to 15% in 2011. Globally, figures indicate that women's participation in the ICT and digital sector are not improving significantly.

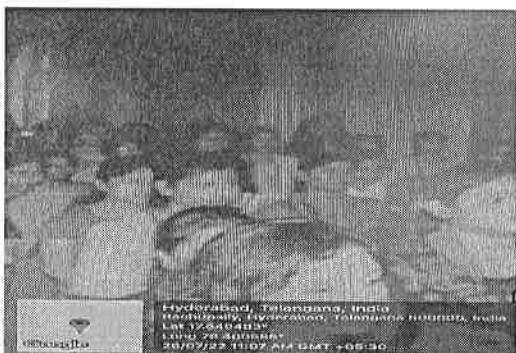

WOMEN IN DIGITAL PROFESSIONS

In 2015, 5.8% of European workers were employed in digital jobs, compared to 5.4% in 2011. The slight growth is common for both men and women, but there was a higher growth for men, resulting in a wider gender gap. The share of men working in the sector is a 313% greater than the share of women. Women represent only 21.5% of all workers in digital jobs.

WOMEN'S CHALLENGES IN THE DIGITAL AGE

Despite increased awareness and numerous initiatives, women still face significant challenges in the sector that affect all stages of female's career paths and life courses in the digital sphere. These challenges include:

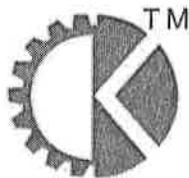

- Unconscious biases
- Problems relating to professional and personal life

PROMOTING GENDER EQUALITY IN THE WORKPLACE

Gender inequality in the workplace is an important issue for any business. Enhancing workplace diversity and alleviating gender discrimination may increase productivity, reduce conflict and prevent legal issues. Gender equality can help capture the skills, ideas and perspectives that each employee offers. Not only that, but people want to work at companies that prioritize equality. According to an indeed survey, 55% of job seekers said it's "very" or "extremely" important to work at a company that prioritizes diversity and inclusion. For this reasons, its important to be intentional about taking steps to promote gender equality in your workplace.

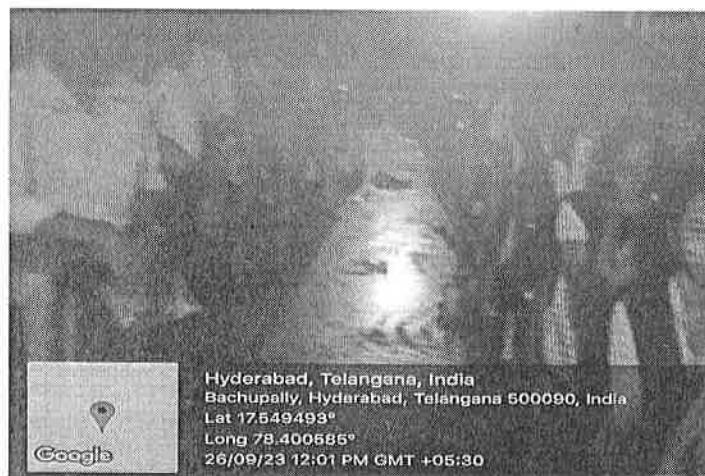

WHAT IS GENDER EQUALITY IN THE WORKPLACE?

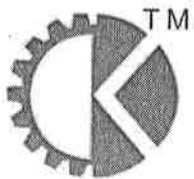

Gender equality in the workplace means employees of all genders have access to the same rewards, opportunities and resources at a company, including:

- Equal pay and benefits for comparable roles with similar responsibilities.
- Equal consideration of needs.

BENEFITS OF GENDER EQUALITY IN WORKPLACE

- Positive company culture:-A gender equal environment where all employees feel respected and valued creates an overall positive workplace. This gender-diverse culture may help your employees notice that their co-workers have talents and strengths they don't possess. Appreciation for these differences can help promote respect.

WOMEN EMPOWERMENT AND TECHNOLOGY

As the technology has changed the way people a business functions, peoples thinking, behaving, communicating and working at different work places. Technology has been linked to changes in the world particularly seen a game changer for women who are facing large barriers in accessing, using and owning technology. While new technologies offer huge potential to increase economic opportunities-from mobile computer and digital technologies which facilitate trade and access to local and global markets, grow in Hi-tech industries which facilitate and create skill jobs.

We are living in a technological age, technology is helping women to advance their careers and contributions in their open sources community. So, the question arises, does technology really has a potential to support women's empowerment? So, for as women empowerment of the women is concerned, it become a legal these days to provide protection at working sites apart from other essential facilities. This paper means in participation of women in technology and addresses the issues regarding women empowerment and technology.

FREEDOM OF MOVEMENT OF WOMEN

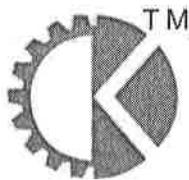

'Freedom of movement' is an integral component of women's empowerment. However, according to the National Family Health Survey-4 (2015–2016), only 41 per cent of women in India enjoy complete mobility. This article examines women's mobility as a function of factors within the household—specifically a woman's relation to the household head—and its physical

location, particularly whether it is located within a rural or an urban area. Using Bayesian inference techniques, we find that daughters-in-law are the least mobile, while spouses are the most. Additionally, we find that women are the most mobile when visiting the market and least mobile when visiting relatives. We also find that women from urban areas are more mobile than those in rural areas. The study goes on to enumerate the value of being able to move without any restrictions on employment. We establish that mobility is positively correlated with work. The article contributes to the limited research on urban women's mobility and agency and how it varies with household practices and spatial location.

Get full access to this article

freedom of movement According to the survey, women have the freedom of movement 'if they are usually allowed to go alone to all three of the following places: to the market, to the health facility, and to places outside the village'.

WOMEN'S ECONOMIC EMPOWERMENT

The Women's Economic Empowerment team focuses on increasing women's power and influence by removing barriers to work, enabling decent work, and supporting women's enterprises in order to help women and girls thrive in the economy. We look for ways to reach large numbers of low-income women. Furthermore, women's empowerment refers to women's ability to make strategic life choices that were previously denied them. Nations, businesses, communities and groups may benefit from implementing programs and policies that adopt the notion of female empowerment.

Even before the COVID-19 pandemic, the difference in expected lifetime earnings between women and men amounted to US\$172.3 trillion globally, according to the World Bank. Labor force participation by women ages 25 to 54 was 63%, compared to 94% for men of the same age.

The routine underutilization of women's skills has been a lost opportunity not only for women but also their families and entire economies. One outcome of the pandemic is that it has shone a harsh light on these fundamental inequities—and created an opportunity to shift the dynamic on women's empowerment. We know that:

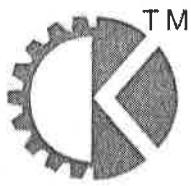

- Historically, economic development leads to gains in gender equality and GDP per capita.
- Increasing women's participation in the economy leads to gains at home, at work, and in society at large.
- When women have economic power, their families benefit too.
- The capacity of both women and men to participate in, contribute to, and benefit from economic growth is essential to transforming the lives of poor and marginalized women and girls.

The evidence supporting the benefits of women's economic empowerment is strong: *When money flows into the hands of women—and when those women have the power to save and spend that money—the lives of people all over the planet are better.* In fact, if the more than 3 billion women and girls worldwide could participate in, contribute to, and benefit from economic growth, we could begin to address some of the most persistent root causes of poverty—and build stronger safety nets for when economic uncertainty hits.

When we remove the barriers that women and girls face and provide opportunities for them to fulfill their aspirations, we unleash a powerful and urgently needed engine of progress—women's talent, energy, and creativity—to help build economies and solve problems.

Economic empowerment is the ability to make and act on decisions that involve the control over and allocation of financial resources (Golla et al., 2011).

WOMEN'S ENTREPRENEURSHIP

The increasing presence of women as entrepreneurs has led to significant business and economic growth in the country. Women-owned business enterprises are playing a prominent role in society by generating employment opportunities in the country, bringing in demographic shifts and inspiring the next generation of women founders. Women's entrepreneurship is a dynamic and growing field, with women around the world increasingly taking the lead in starting and managing businesses.

Women entrepreneurs in India have significantly influenced the social and economic demographics of the country. They are active in sectors such as e-commerce, fashion, education, healthcare, and technology, bringing new ideas and approaches to traditional industries and creating innovative products and services. They are active in sectors such as e-commerce, fashion, education, healthcare, and technology, bringing new ideas and approaches to traditional industries and creating innovative products and services.

The landscape of women entrepreneurship in India is a testament to their indomitable spirit and innovative prowess. Despite the hurdles, women entrepreneurs are not only creating job opportunities and driving economic growth but are also challenging deep-rooted gender norms and stereotypes, thereby paving the way for a more inclusive and equitable society.

(Approved by AICTE, Affiliated to JNTUH)

ADDRESSING GENDER-BASED VIOLENCE

Gender-based violence includes any kind of violence directed against people due to their gender or gender identification.

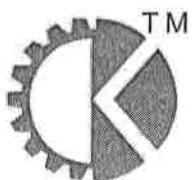

Types of gender-related violence include:

- Violence against women (sometimes referred to simply as "gender violence")
- Violence against men
- Violence against LGBT people
 - Violence against transgender people, including non-binary people
 - Gay bashing, which may be related to gender expression
- School-related gender-based violence
- Online gender-based violence, violence against any of the above groups (although disproportionately women) that takes place online

Violence against women in India refers to physical or sexual violence committed against a woman, typically by a man. Common forms of violence against women in India include acts such as domestic abuse, sexual assault, and murder. There are several forms of violence against women, murder (dowry deaths, honor killings), female infanticide, sexual crimes (rape, modesty related violence, human trafficking, forced prostitution, domestic violence), acid throwing, perpetuation.

A dowry death is the murder or suicide of a married woman caused by a dispute over her dowry.^[3] In some cases, husbands and in-laws will attempt to extort a greater dowry through continuous harassment and torture which sometimes results in the wife committing suicide.^[4] The majority of these suicides are done through hanging, poisoning or self-immolation. Bride burning, a form of dowry death, occurs when a woman is set on fire. This act is referred to as bride burning murder, and it is frequently staged to look like a suicide or accident. In some instances, the woman is set on fire in a manner that suggests she caught fire while cooking on a kerosene stove.^[5] Despite the illegality of dowry in India, the tradition of giving costly gifts to the groom and his relatives remains prevalent at weddings organized by the bride's family.

Online gender-based violence is targeted harassment and prejudice through technology against people, disproportionately women, based on their gender. The term is also similar to online harassment, cyberbullying but the latter terms are not gender-specific. Gender-based violence (GBV) stands as one of the most pervasive violations of human rights across the globe, profoundly affecting individuals, families, and entire communities. This deeply concerning issue transcends both conflict and non-conflict settings, but its impact intensifies during times of crisis.

WOMEN'S HEALTH AND WELLNESS

Women's wellness is an important concern because even today, women face discrimination in social culture.

According to the World Health Organization, over 800 women die every day

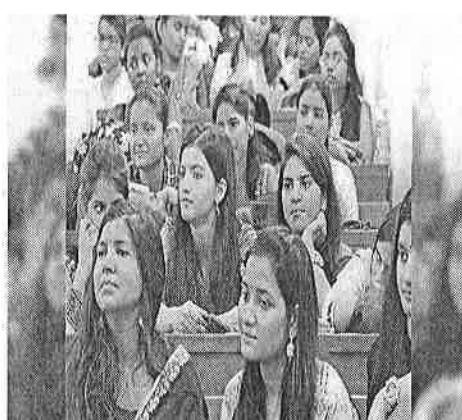

Wellness is subjective to each individual's life; it may be a satisfaction to their mental, physical, emotional, spiritual, economic, social, and occupational dimensions. Women's wellness's vital target is to focus on those aspects concerning their well-being. In women's health, reproductive and hormonal problems, gastrointestinal stress, bone health, and urinary incontinence are some elements with disruptions.

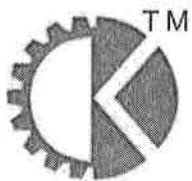

There are relatively few physical disorders unique to women that are more prevalent or severe. They need special prevention care or interventions as a prudent plan. The earliest physical disorder in a woman is when precocious puberty, to which there is an effective treatment newly developed. Disorders like bulimia (life-threatening eating disorder) and anorexia (abnormally low body weight) gradually increase among young women.

Moderate physical exercises—walking, using stairs by avoiding lifts, gardening, running errands, housework- car help you stay healthy and lower the risk of heart diseases. Then are classic aerobic activities—hiking, jogging swimming, and using a jumping rope. Any physical activity for 30 minutes in a day can strengthen your heart. It is suitable for older women to include stretching, strength training, and aerobics in their routine. But, it is recommendable that older women start slowly with their exercise or wellness journey. Stretching before involving in other activities can allow them to be flexible and reduces injuries. Regular aerobic can strengthen and improve their heart condition by increasing the ability to use oxygen without any consequences. Low-impact activities such as swimming, dancing, and walking can more likely give them body stress.

Women's health refers to the branch of medicine that focuses on the treatment and diagnosis of diseases and conditions that affect a woman's physical and emotional well-being.

Physical health is a fundamental component of women's wellness. This includes reproductive health, nutrition fitness, and preventive care. Regular gynecological check-ups, screenings for breast and cervical cancer, and family planning services contribute to maintaining women's reproductive health.

Promoting Women's Rights

Promoting women's rights is crucial for achieving gender equality and ensuring that women and girls can fully enjoy their human rights. Here are some key aspects and strategies:

- Legal and Policy Frameworks**: Adoption of supportive laws and policies: Implementing laws that protect women's rights and repealing discriminatory laws are essential steps.
- Access to justice**: Ensuring women have access to legal resources and support to defend their rights.
- Economic Empowerment**: Equal economic opportunities: Promoting women's participation in the workforce and ensuring equal pay for equal work.
- Support for women entrepreneurs**: Providing resources and support for women to start and grow their own businesses.
- Education and Awareness**: Raising awareness: Educating communities about the importance of gender equality and women's rights.
- Supporting education for girls**: Ensuring girls have access to quality education, which is fundamental for their empowerment.

Combating Violence Against Women

Protection from violence: Implementing measures to protect women from domestic violence, sexual harassment, and other forms of violence.

Support services: Providing support services for survivors of violence, including legal aid, counseling, and shelters.

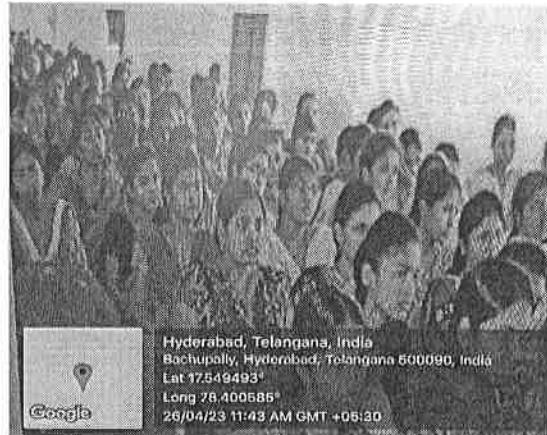

Political Participation: Encouraging political involvement: Promoting women's participation in political processes and decision-making at all levels.

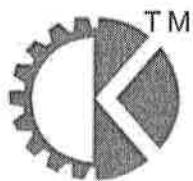

Leadership roles: Supporting women to take on leadership roles in their communities and beyond.

Community and Global Efforts: Community support: Encouraging communities to support women's rights initiatives and create safe environments for women.

Global collaboration: Working with international organizations to promote women's rights and gender equality globally.

Promoting women's rights is not just about justice; it's about creating a more equitable and prosperous society for everyone.

PASSION INTO ACTION

6 Ways to Put Your Passion Into Action

1. Avoid over-reading the research:

If you're spending all of your time reading about your passion - what other people are doing and what the latest statistics are showing - then you're not putting yourself or your ideas out there.

Researching about your passions is a great place to start, but if you're perpetually dreaming and scheming about what you want without actually stepping out in the world to see how it feels, then you'll never really know whether or not (1) your idea works or (2) it's something you want to devote your time and energy to.

2. Start with your best guess:

Consider the people you admire most: the entrepreneurs who took a risk, the writers who wrote something spectacular, the corporate lawyer who quit her job to start a catering company. None of those people knew exactly what their vision was when they first started. They all started by taking action on their best guess. Then, they followed the secret formula.

3. Get comfortable with taking action that you know isn't exactly right:

Even if you know your best guest isn't exactly right, take action anyway. Don't allow this to be an opportunity to procrastinate, because (1) your first step will never be your best step, and an average first step is leaps and bounds better than no first step at all.

4. Make your actions bite-sized:

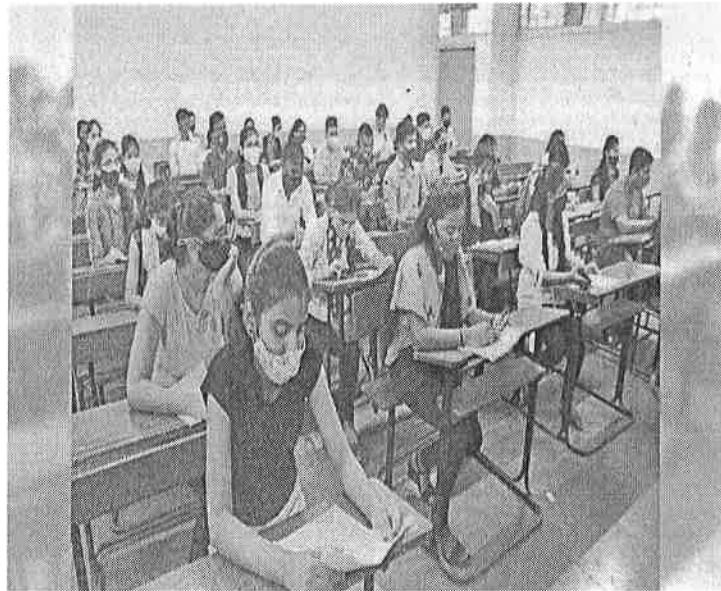

If you're not sure what you want, you likely fear taking action that ends up being "wasted time." First of all, there is no wasted time. It's all part of your growth, development, and understanding of what you most want and don't want.

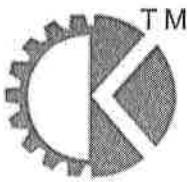

5. See all past efforts as valuable feedback (not failure):

Do not use your lack of clarity as an invitation to self-criticize. Clarity through action takes time. Clarity doesn't come overnight. It's a long-term process that requires determination and perseverance (remember, Doc Moments are rare).

6. Push on the edges of your comfort zone:

Don't stay cocooned in your comfort zone. Instead, push up against your edges in a way that feels both challenging and freeing.

(Approved by AICTE, Affiliated to JNTUH)

WOMEN AND EDUCATION

Education is the basic right of any human. May it be a girl or a boy child, education has set no boundaries. Education enlightens the soul and makes a human differentiate between wrong and right, justice and injustice. Education is not a requirement, but instead a necessity of life.

Women are the building blocks of society. They play a vital role in empowering every aspect of society and the nation. A nation is considered as well established and empowered only when the female population of the country is established, empowered, and safe. Education is that key element that helps every individual conquer the greatest war and also create the most impactful changes in the world.

A woman is such an individual who has the knowledge and temperament to create lives with meaning. Promoting women's education is as necessary and useful as oxygen is for breathing. India has been able to generate some of the famous leaders who are female. Yet, in most of the portions of the country, women still lack the benefit of getting an education and are deprived of their basic amenities and rights.

Importance of Women's Education

Education is a basic right for everyone. Education for all is one of the major tasks that the Indian government is working on, but still, India holds the lowest female literacy rate in the Asian region.

Society takes birth from the woman herself, and when the woman is not given the access to education, then the society will be debarred from all the primary cultures, habits, and traits that a human must inculcate in them. When a woman is literate in a family, it brings out the best versions of a human being in them. The importance of a woman's education is reflected in the generation of the family and the way of living of the family.

In a society, equality matters a lot to maintain a balance. Discrimination and inequality are the two cursed spells of society that creates an imbalance in society. Only prioritising the male gender in society brings out all the negativities in a society and then in the family itself. Depriving the girl child of attending schools or restricting them from getting their basic rights makes them weaker. They suffer domination from the male section of society. This makes a society weaker and even violates the basic rights of a human. Democracy is only applicable and is flexible when the individuals of the society live freely and equally in the society.

Education for women is important because it makes them empowered and independent and helps them build self-confidence. It helps them dream and aim for a better future. It boosts their strength and gives them the spark to work harder for themselves and achieve their dreams.

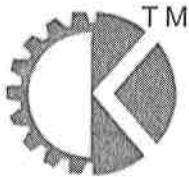

Factors Affecting Women's Education

Females are a very vulnerable section of society. There is a list of factors that creates problems for the education of women. The basic dilemma that lies in educating a female child depends more upon the family to which she belongs rather than the whole society or the whole nation.

The various factors that yet are considered to be the reasons for causing problems in the education of the females are:

1. Social discrimination
2. Gender inequality
3. Economic exploitation

(Approved by AICTE, Affiliated to JNTUH)

CLOSING THE GENDER PAY GAP

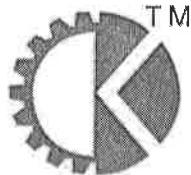

Gender Pay Gap in India refers to the difference in average wages or earnings between men and women in the country. Despite constitutional provisions and various efforts to promote gender equality, the gender pay gap remains a significant issue in India.

gender equality and economic empowerment of women.

REASONS FOR GENDER PAYGAP

- **Occupational Segregation:**
 - Women tend to be concentrated in lower-paying occupations, such as caregiving and administrative work, while men are overrepresented in higher-paying industries like technology, engineering, and finance.
- **Discrimination:**
 - Women may face bias in hiring, promotions, and pay, even when their qualifications and experience are equal to those of their male colleagues.
- **Workforce Participation:**
 - Women are more likely to take time off or work part-time to care for children or elderly relatives, which can lead to interruptions in their career paths and lower overall earnings.
- **Negotiation:**
 - Women are less likely to negotiate for higher pay or benefits because the opportunities for them are less, which can result in lower compensation packages.
- **Limited Access to Education and Training:**
 - Women may have less access to educational and training opportunities, due to patriarchal beliefs that girls and women must be the ones doing household labour.
 - It can limit their ability to acquire the skills and credentials necessary for higher-paying jobs.
- **Lack of Mobility to Reach Job Sites:**
 - Women are also more likely to have transportation challenges, such as lack of access to reliable transportation, which can limit their ability to reach job sites. This can result in women being excluded from certain jobs or industries, which can limit their earning potential.
- **Discontinuity of Experience owing to Family Responsibilities:**
 - Women are more likely than men to take time off work to care for children or other family members. This can result in a discontinuity of experience, making it harder for women to advance in their careers and earn higher salaries.

WOMEN SELF EMPLOYMENT

● Self-Employed Women in India

The number of self-employed women in India stood at 88 million in 2021. On a year-on-year basis, the indicator increased in India by 9.4% in 2021. Between 2010-2021, the number of self-employed women in India increased by 14.5%. The country had the highest number of self-employed women in the year 2021, and the lowest in the year 2018

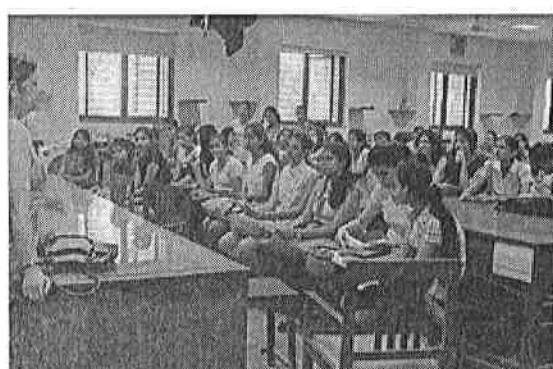

Self-employed persons are the ones who work in their own businesses, farm, or professional practice. The total self-employed population is calculated by adding the self-employed female population and the self-employed male population. A self-employed person is considered to be working if she/he meets one of the following criteria: works for the purpose of earning profit spends time on the operation of a business or is in the process of setting up his/her business. Self-employed persons include employers and own-account workers.

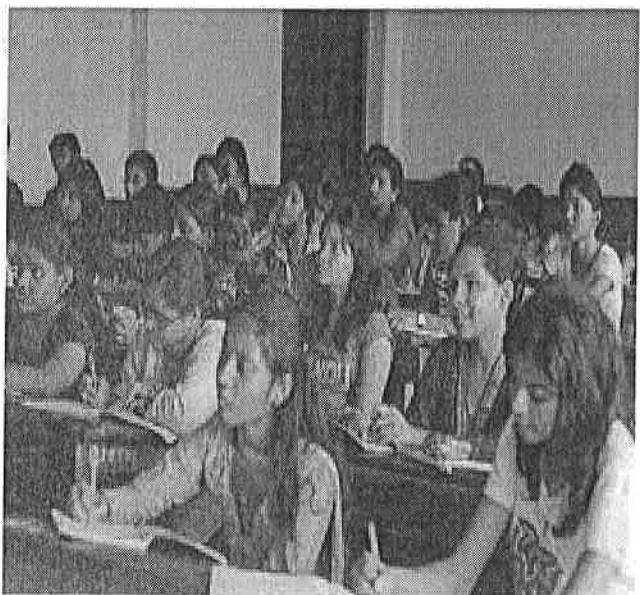

● Self-Employed Women: Global Scenario

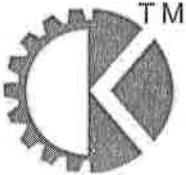

According to Global Data , India, Indonesia, Bangladesh, Vietnam, Ethiopia, Tanzania, Brazil, Pakistan, Thailand, and Mexico are some of the countries with the highest number of self-employed women in 2021. Seychelles, Iceland, Barbados, Brunei, Malta, Saint Lucia, Luxembourg, Montenegro, Jordan, the Republic of Kosovo, and Cyprus are some of the countries with the lowest number of self-employed women in 2021. Between 2010 and 2021, Maldives, Malta, Luxembourg, New Zealand, South Africa, Ecuador, Israel, and Panama were some of the countries with the highest growth in the number of self-employed women. Romania, Egypt, South Korea, Croatia, Moldova, Portugal, Ukraine, Afghanistan, North Macedonia, Bosnia and Herzegovina, Turkey, and Slovenia were some of the countries with the lowest growth in the number of self-employed women between 2010 and 2021.

● Factors Impacting Self-Employment

Population rate, education, economic cycle, industrial growth, socio-cultural factors, increasing unemployment levels, and income support policies are some of the factors that impact self-employment levels in a country.

NUTRITION

Nutrition is a critical part of health and development. Better nutrition is related to improved infant, child and maternal health, stronger immune systems, safer pregnancy and childbirth, lower risk of non-communicable diseases (such as diabetes and cardiovascular disease), and longevity.

Healthy children learn better. People with adequate nutrition are more productive and can create opportunities to gradually break the cycles of poverty and hunger.

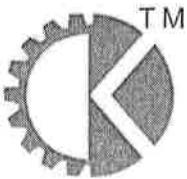

Malnutrition, in every form, presents significant threats to human health. Today the world faces a double burden of malnutrition that includes both undernutrition and overweight, especially in low- and middle-income countries. There are multiple forms of malnutrition, including undernutrition (wasting or stunting), inadequate vitamins or minerals, overweight, obesity, and resulting diet-related noncommunicable diseases.

The developmental, economic, social, and medical impacts of the global burden of malnutrition are serious and lasting for individuals and their families, for communities and for countries.

Nutrition is the biochemical and physiological process by which an organism uses food to support its life. It provides organisms with nutrients, which can be metabolized to create energy and chemical structures. Failure to obtain the required amount of nutrients causes malnutrition. Nutritional science is the study of nutrition, though it typically emphasizes human nutrition.

Nutrients are substances that provide energy and physical components to the organism, allowing it to survive, grow, and reproduce. Nutrients can be basic elements or complex macromolecules. Approximately 30 elements are found in organic matter, with nitrogen, carbon, and phosphorus being the most important.^[5] Macronutrients are the primary substances required by an organism, and micronutrients are substances required by an organism in trace amounts. Organic micronutrients are classified as vitamins, and inorganic micronutrients are classified as minerals.

IGNITE YOUR INNER LIGHT

"Ignite Your Light" is a powerful concept that encourages individuals to embrace their inner strength and shine brightly in their lives. Here's an essay that explores this idea: Ignite Your Light: Embracing Inner Strength and Positive. In a world filled with challenges and uncertainties, the concept of "igniting your light" serves as a beacon of hope and resilience. This phrase, often used metaphorically, encourages individuals to tap into their inner strength, positive, and unique qualities to illuminate their path and inspire others. The journey to ignite one's light involves self-discovery, embracing authenticity, and spreading positive.

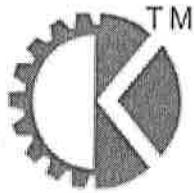

Self-Discovery and Inner Strength: The first step in igniting your light is self-discovery. This involves understanding your passions, strengths, and values. By reflecting on what truly matters to you, you can identify the sources of your inner light. This process requires introspection and a willingness to explore your true self.

Embracing Authenticity: Authenticity is a crucial aspect of igniting your light. It means being true to yourself and embracing your unique qualities. In a society that often pressures individuals to conform, staying authentic can be challenging. When you embrace your true self, you inspire others to do the same, creating a ripple effect of positive and empowerment.

Spreading Positive: Igniting your light is not just about personal growth; it also involves spreading positive to those around you. Acts of kindness, encouragement, and support can have a profound impact on others. By sharing your light, you create a supportive and uplifting environment. This can be as simple as offering a kind word, lending a helping hand, or being a source of inspiration.

"Ignite Your Light" is a call to action for individuals to embrace their inner strength, authenticity, and positive. By embarking on a journey of self-discovery, staying true to oneself, and spreading kindness, we can illuminate our paths and inspire others to do the same. In doing so, we create a brighter, more compassionate world where everyone's light can shine.

WOMEN IN INNOVATION

Women have been making significant strides in the field of innovation, breaking barriers and leading groundbreaking projects across various industries. Here are some key points about women in innovation:

Professional Communities: Organizations like Women in Innovation (WIN) provide a platform for women to connect, share resources, and support each other. WIN aims to increase the impact and influence of women in innovation by offering programs, events, and resources.

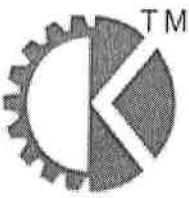

Notable Innovators: Women like Annabelle Huang, who has made significant contributions in the block chain and digital assets space, exemplify the impact women can have in traditionally male-dominated fields.

Challenges and Progress: Despite the progress, women still face challenges such as gender gaps in leadership positions and funding. For example, only 2% of venture capital funding went to women-only founded startups in 2022.

Inspirational Stories: Many women innovators are celebrated for their perseverance and ability to overcome obstacles. Their stories inspire future generations to pursue their dreams and challenge the status quo.

Women have made and continue to make invaluable contributions to innovation. While significant progress has been made, there is still much work to be done to ensure that women have equal opportunities to innovate and lead. By supporting and celebrating women innovators, we can foster a more inclusive and dynamic future for all.

SELF CARE AND PERSONAL DEVELOPMENT

Self-care and personal development are closely linked, as taking care of yourself is essential for personal growth. Here are some key points to consider: Self-care involves activities and practices that you engage in regularly to reduce stress and maintain and enhance your health and well-being. It includes: Physical Self-Care: This involves taking care of your body through exercise, nutrition, sleep, and regular medical check-ups. Mental Self-Care: Activities that stimulate your mind, such as reading, learning new skills, and engaging in hobbies. Emotional Self-Care: Practices that help you manage your emotions, talking to a friend, or seeking therapy. Spiritual Self-Care: Activities that nurture your spirit, such as meditation, prayer, or spending time in nature.

Personal Development: Personal development focuses on activities that improve your talents, potential, and overall quality of life. It includes: Setting Goals: Identifying what you want to achieve and creating a plan to reach those goals. Continuous Learning: Engaging in lifelong learning through courses, reading, and new experiences. Building Resilience: Developing the ability to bounce back from setbacks and challenges. Improving Skills: Enhancing both personal and professional skills to increase your effectiveness and satisfaction.

The Connection: Self-care is a foundational aspect of personal development. By taking care of your physical, mental, emotional, and spiritual health, you create a strong base from which you can grow and develop in other areas of your life.

DOMESTIC VIOLENCE

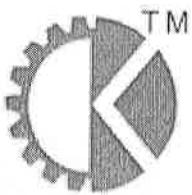

Domestic violence, also known as intimate partner violence, involves abusive behaviors by one partner to maintain power and control over another. This can include physical, emotional, sexual, and abuse. It's a serious issue that affects individuals regardless of age, gender, or socioeconomic status.

If you or someone you know is experiencing domestic violence, it's important to seek help. There are resources available, such as the National Domestic Violence which offers support 24/7.

Raising awareness about domestic violence is crucial in helping to prevent and address this serious issue. Here are some key points to consider: Forms of Abuse: Domestic violence can be physical, emotional, psychological, sexual, or financial. It often involves a pattern of behavior to control and dominate the victim. Signs of Abuse: These can include physical injuries, changes in behavior, isolation from friends and family, and fear of the partner. Impact on Victims: Physical Health: Injuries, chronic health problems, and even death. Mental Health: Anxiety, depression, and low self-esteem. Social Consequences: Isolation, difficulty maintaining employment, and strained relationships.

Domestic violence is a critical issue that requires a comprehensive approach to address. By understanding its causes, recognizing its signs, and supporting victims, we can work towards a society where everyone feels safe and respected.

WOMEN AND DIGITAL DEVELOPMENT

Digital development has the potential to significantly empower women and girls, but there are still many challenges to overcome. Here are some key points:

Challenges: Access and Affordability: Globally, men are 21% more likely to be online than women, and this gap widens to 52% in low-income countries. High costs of devices and data, along with lower digital skills, are major barriers.

Digital Skills and Education: Women often have less access to education and training in digital skills, which limits their participation in the digital economy.

Online Safety: Women face higher risks of online harassment and gender-based violence, which can deter them from fully engaging in digital spaces.

Opportunities: Economic Empowerment: Digital technologies can provide women with new economic opportunities, such as online businesses and remote work.

Education and Training: Initiatives that focus on digital literacy and STEM education for girls and women can help bridge the gender gap in technology.

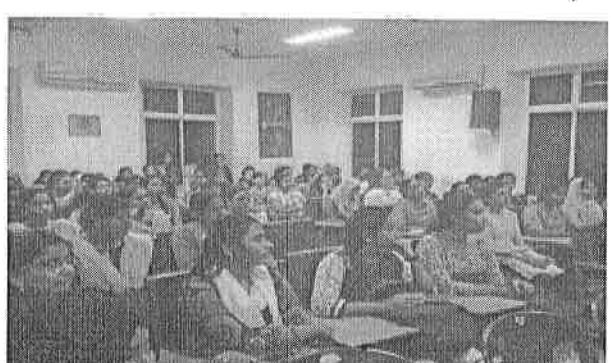

Policy and Advocacy: Governments and organizations are increasingly recognizing the importance of gender equality in digital development and are working to create more inclusive policies.

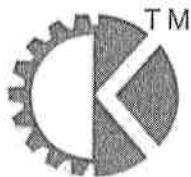

Initiatives and Solutions: Digital Infrastructure: Improving access to affordable internet and devices, especially in safe public spaces like libraries and community centers.

Digital Public Platforms: Ensuring women have access to digital identification and other public platforms by addressing legal and logistical barriers.

Support Networks: Leveraging women's groups and trusted networks to share information and provide support for digital inclusion.

By addressing these challenges and leveraging opportunities, we can work towards a more inclusive digital future where women and girls can thrive.

Freedom of movement of women

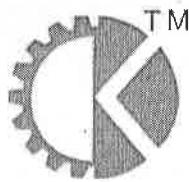

Freedom of movement' is an integral component of women's empowerment.

Freedom of movement is the right to move around freely as we please – not just within the country we live in, but also to visit others. But many women face real challenges when it comes to this.

The right to health is inseparable from realization of the right to freedom of movement, both of which are recognized as fundamental human rights. However, we continue to see restrictions on a woman's ability to leave her house or country used as political, religious, and social tools of oppression, limiting her right to receive the health care she desires. In this commentary, I will assess how restricting a woman's right to movement also limits her access to health care. First, I will describe why freedom of movement is an important indicator of empowerment and autonomy, especially for women.

“Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it’s the only thing that ever has.”

Women in Technology

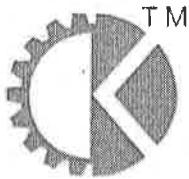

Women in Technology (WIT) is a 501(c)(3) nonprofit organization dedicated to addressing the underrepresentation and challenges women and girls face in STEAM (science, technology, engineering, the arts, and math). WIT empowers women and girls to excel from the classroom to the boardroom by providing education, exposure, and experience. Our programs are designed to ensure a diverse tech talent pipeline, challenge stereotypes, and bring about significant change in the industry.

Today marks Ada Lovelace Day, an international celebration of the outstanding achievements of women in science, technology, engineering and maths (STEM). It is a day to showcase the vital work that women in STEM currently do, and to inspire the next generation of young women to follow in their path.

We are a dynamic and inclusive community dedicated to fostering empowerment, diversity, and innovation within the technology sector. Whether you're a seasoned professional, a student aspiring to enter the tech field, or a passionate advocate for gender equality, Women in Tech India welcomes you. Through networking events, mentorship programs, and skill-building initiatives, to excel in technology-related careers, and shape the future of the tech industry in India and beyond.

Join Women in Tech India on this exciting journey towards a more equitable tech ecosystem. Together, we rise and inspire.

Child marriage

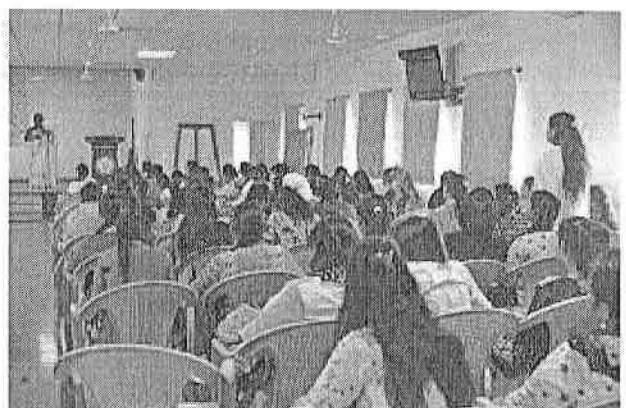

Whoever performs, conducts, directs or abets any child marriage shall be punishable with rigorous imprisonment which may extend to two years and shall be liable to fine which may extend to one lakh rupees unless he proves that he had reasons to believe that the marriage was not a child marriage.

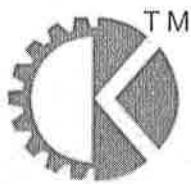

The Prohibition of Child Marriage Act, 2006 replaced the 1929 Act, with the same minimum age limits.

Child marriage refers to any formal marriage or informal union between a child under the age of 18 and an adult or another child. Despite a steady decline in this harmful practice over the past decade, child marriage remains widespread, with approximately one in five girls married in childhood across the globe.

Child marriage violates children's rights and places them at high risk of violence, exploitation, and abuse. Child marriage affects both girls and boys, but it affects girls disproportionately.

Marriage before the age of 18 is a fundamental violation of human rights. Many factors interact to place a child at risk of marriage, including poverty, the perception that marriage will provide 'protection', family honor, social norms, customary or religious laws that condone the practice, an inadequate legislative framework and the state of a country's civil registration system. While the practice is more common among girls than boys, it is a violation of rights regardless of sex.

Workplace sexual harassment

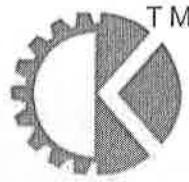

Workplace sexual harassment takes many different forms. It can come from a coworker, a supervisor, or a customer or client, and ranges from unwanted touching, inappropriate comments or jokes, or someone promising you a promotion in exchange for sexual favors.

Sexual Harassment" includes anyone or more of the following unwelcome acts or behavior (whether directly or by implication), namely :

1. Physical contact or advances;
2. A demand or request for sexual favors;
3. Making sexually colored remarks;
4. Showing pornography;
5. Any other unwelcome physical, verbal or non-verbal conduct of a sexual nature.

VIOLENCE AND DISCRIMINATION

"Violence against women" means all acts perpetrated against women which cause or could cause them physical, sexual, psychological, and economic harm, including the threat to take such acts; or to undertake the imposition of arbitrary restrictions on or deprivation of fundamental freedoms in private or public life in ...

Violence against women is one of the most frequent human rights violations. It is a threat to women's lives, it puts their physical and psychological health at risk, and it is a threat to the well-being of their children. Violence against women has consequences for society as a whole. The perpetrators can be found in every social and economic milieu, and most of them are male.

Violence against women is an expression of unequal power relationships between men and women. So the causes of this violence are to be found not only at the individual level but also, and particularly, at the structural level. These causes need to be eliminated in order to prevent further violence. Gender justice cannot be established unless misogynist structures are resolved. Only then will women and girls be able to live a life free of violence.
