

**2.3.1 Student centric methods such as experimental learning, participative learning and problem solving methodologies are used for enhancing learning experiences using ICT Tools.**

S.NO	DESCRIPTION
1	Experiential learning (Real time projects, Seminar Presentation, Guest lectures and activities)
2	Participative learning (interactive classrooms, Add-On Programs, Extracurricular Activities)
3	Self-Learning (internships, Digital Library)
4	Problem solving methodologies (Final year Projects, Tutorial Classes)

**Experiential Learning:**

- The institute organizes real-world projects, which provide students with opportunities to deepen their understanding of the practical aspects of their studies.

**Revolutionizing Diabetes Mellitus Type 2 Detection: A Deep Learning CNN Model on the Sylhet Dataset**

**Objectives**

- To Develop and implement a sophisticated Convolutional Neural Network (CNN) model for the precise classification of Type 2 Diabetes Mellitus, leveraging the Sylhet Diabetes Dataset.
- To optimize classification performance, include a customized Deep seven layer CNN architecture. This approach aims to create a scalable and integrative framework for deploying deep learning techniques.

**Proposed Methodology:**

- Implemented a customized seven-layer CNN for the Sylhet Diabetes Dataset, featuring Conv2D layers, ReLU activation, and MaxPooling2D for hierarchical feature extraction and dimensionality reduction, to prevent overfitting, employed dense and dropout layers, which are optimized with binary cross-entropy loss and the Adam optimizer.

**Tools and Technologies:**

- The project employs Jupyter Notebook as the development environment, leveraging Keras and TensorFlow libraries for deep learning implementation. Python serves as the primary language for coding within Google Colab, facilitating seamless integration and execution of the customized CNN architecture for diabetes classification.

**Outcome:**

- Integrating cutting-edge deep learning techniques with the Sylhet Diabetes Dataset enhances Type 2 Diabetes Mellitus diagnosis efficiency, paving the way for personalized treatment strategies. Continuous innovation aims to broaden clinical application, improve model accuracy, and democratize healthcare access through user-friendly diagnostic tools for remote monitoring and screening.

A flowchart illustrating the Deep Learning CNN Model process. It starts with 'Input Data' (Sylhet Diabetes Dataset), followed by 'Data Preprocessing' (Feature scaling, Label encoding). This leads to 'Feature Extraction' (Convolution, Pooling, Normalization). The next step is the 'CNN Model' (Customized Seven Layer CNN with Dense and Dropout layers). Finally, the process ends with 'Model Training' (using TensorBoard for Monitoring).

(Approved by AICTE, Affiliated to JNTUH)

- Students are instructed to present seminars on specific topics, thereby demonstrating their proficiency in presentation skills.
- Departments conduct guest lectures and various activities designed to enhance students' learning skills, leadership abilities, and subject knowledge.

### **Participative Learning:**

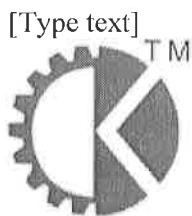

Participative learning environment is created in the class room for the students to actively interact during the lectures through

Interactive Classrooms :the students engage in group discussion ,quizzes, questioning methods, so on

- Group Discussions:

Our college conducted Group discussions to improve the communication skills ,to build the leadership quality.

  
PRINCIPAL  
DRK Institute of Science & Technology  
Bowrampet, Quthbullapur, Hyderabad-500 043.

(Approved by AICTE, Affiliated to JNTUH)

Through this activity create educational awareness of team leading. Meanwhile students get positive attitude,team buildings ,politeness,common challenges,active listening,clear communication and respectful dialogue

Group discussion can lead to innovative ideas and solutions

Group discussion among students to improvise their communication and coordination skills

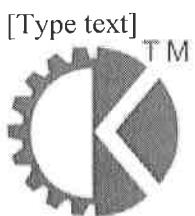

- Questioning method :

The questioning method is technique used to encourage critical thinking,explore ideas and gather information through Targeted questions.

They seek additional information and clarification, and also encourage honest response to gather valuable information.

Asking questions will develop the problem solving skills.

Students are enjoying the Sankranti (featival of kites)

### Self- Learning:

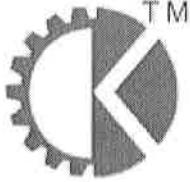

Self-learning is a process in which people proactively self-direct their learning journeys, identifying their own learning goals and holding themselves accountable for reaching them. It takes dedication, motivation, and self direction to be a successful self-learner.

- Students undertake self-learning through the content that can be accessed from the internship programs.

Students participated in self-learning internship program

*Lalit*

DRK Institute of Science & Technology  
Bowrampet, Quibbulapur, Hyderabad-500 043.

### Problem-Solving Methodology:

As part of the curriculum and assessment, the following methods are adopted:

- Final year projects at both undergraduate and postgraduate levels.
- Tutorial classes conducted by the departments to strengthen the regular teaching-learning process.
- Group assignments.

**OUTSMARTING CREDIT CARD FRAUD: LEVERAGING KNN ON THE IEEE-CIS DATASET FOR ADVANCED DETECTION SOLUTIONS**

**Objective:** To Create a sophisticated system capable of identifying credit card fraud in real-time.

**Proposed Methodology:** utilizing a K-Nearest Neighbor (KNN) to achieve fraud with accurate accuracy.

**Technologies used:** Python, Pandas, Scikit-Learn

**Outcome:** by using KNN achieved a significant accuracy of 94% in detecting credit card fraud.

**A METHOD FOR DECRYPTING THE DATA INFECTED WITH MAZE RANSOMWARE**

**Objective:** To decrypt the data infected with the Maze ransomware.

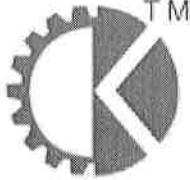

**Proposed Methodology:** Retrieve the chacha20/8 key from the ransom note and construct the original key to decrypt the files.

**Technologies used:** Python, flet, pycryptodome

**Outcome:** Successfully decrypted the files infected with the maze ransomware and recover the files.

**Tutorial Classes:** Mentors can use in tutorial discussions to support students' learning and understanding. These prompts are in the form of open-ended questions which give students the opportunity to talk through, question and reflect on their understanding of the tutorial work.

Types of questions used to ask in this session

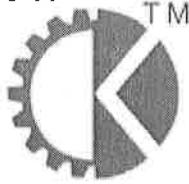

- What is process scheduling ? Discuss about round-robin scheduling?
- Explain the Resource Allocation Algorithm with an example?
- What is directory structure?
- Brief about FCFS, SSTF Disk scheduling Algorithms?
- What is a Directory? Write a short note on Directory implementation?
- Discuss the concepts of asymptotic notations and its properties?
- Bring out the differences between simple and weighted union? Explain with example?
- Write an algorithm if n-queens problem?
- Compare Divide & Conquer and Dynamic Programming?
- Explain the terms feasible solution, Optimal solution and objective function?
- Explain the class of P and NP?
- Explain the general method of branch and bound?
- Explain briefly about internet model?
- Explain and compare the characteristics of guided and unguided Transmission media in detail?
